

# What Moves You Moves the World.

Veteran-owned. Founded in San Diego. Developing connected infrastructure.

## Building the infrastructure behind what comes next.

Vexium Inc. is an emerging infrastructure company developing a connected approach to hydrogen, EV charging, advanced energy, mobility and digital coordination. The ambition is to bring physical systems, qualified partners and useful intelligence together around real operating needs.

### Infrastructure direction

On-site hydrogen pathways, conditioning, storage and dispensing. EV infrastructure aligned with vehicles, dwell time and utility capacity. Distributed power, water and resource planning considered as connected site systems.

### Industry applications

Passenger mobility and fleets; freight and logistics; ports and maritime; data centers and critical facilities; agriculture, communities and public institutions. Each application has its own requirements and development pathway.

### Leadership & purpose

Veteran-owned and founded in San Diego, with a perspective shaped by service and transportation experience. The mission connects useful infrastructure with opportunity for partners, employees and communities.

### A clear ecosystem

**Corporate:** company direction and development context.

**Vexium Energy:** commercial infrastructure and integration.

**Fuel Vexium:** customer discovery, vehicles and journey tools.

**Nexus:** intelligence and coordination across approved systems.

### Development stage

The initial focus is San Diego. Site diligence, demand, engineering, qualified partners, approvals and resources determine project advancement. Application concepts do not represent commissioned Vexium assets or confirmed commercial partnerships.
